

Hamilton Beach 48464 Base Replacement

This guide will show how to properly remove the base. This is important if your base has been cracked or broken in any way or a way to get inside of the coffee maker.

Written By: Michael Damico

INTRODUCTION

Before starting, you should be sure to unplug the coffee maker. Also, be sure to empty all contents before making any repairs.

TOOLS:

- [Crown Bolt #8 Steel Spanner](#) (1)
 - [Phillips #2 Screwdriver](#) (1)
-

Step 1 — Base

- This is what the bottom cover will look like. Flip the Brew Station upside down to easily access the screws.

Step 2

- Using the Philips 2 Screwdriver, unscrew the three 8-mm screws labeled in a red outline.
- Using the Crown Bolt #8 Steel Spanner, unscrew the two 8-mm screws labeled in a orange outline.

Step 3

- Carefully slide off the bottom drip tray by sliding it out away from the Brew Station.

Step 4

- Gently lift the base away from the Brew Station.

To reassemble your device, follow these instructions in reverse order.
